DIGITAL RAINMAKER SYSTEM · SEE THE MATH

What $5,000 a month in ads can turn into.

Three scenarios from conservative to best case, why the back end is where your firm grows, and when you can expect to break even.

CONSERVATIVE

$40,000

new fees a month

2 clients a month | 4× the investment

MODERATE

$60,000

new fees a month

3 clients a month | 6× the investment

BEST CASE

$100,000

new fees a month

5 clients a month | 10× the investment

© 2026 Nexli Automation

HOW THE MATH WORKS

Five numbers decide the result.

Every scenario starts with the same $5,000 a month in ads. What changes is what each booked call costs and how many calls turn into clients.

1 **Ad spend**
$5,000
a month, every scenario

→

2 **Booked calls**
20
$5,000 ÷ $250 a booked call

→

3 **Calls held**
14
70% of booked calls show up

→

4 **Clients signed**
2
14 calls × 15% close rate

→

5 **New fees**
$40,000
2 × $20,000 average plan

EVERY BOOKED CALL IN A MONTH

Booked, didn't show Call held Signed a tax plan

YOU DON'T NEED 100 LEADS

This isn't the bottom-of-the-barrel compliance game. At the conservative pace the whole case rests on **20 booked calls** and **2 new clients a month**.

© 2026 Nexli Automation

THREE SCENARIOS

Same $5,000. Three ways it plays out.

SCENARIO	AD SPEND	COST PER BOOKED CALL	BOOKED CALLS	CALLS HELD	CLOSE RATE	CLIENTS	NEW FEES A MONTH
Conservative	$5,000	$250	20	14	15%	2	**$40,000**
Moderate	$5,000	$200	25	17	20%	3	**$60,000**
Best case	$5,000	$150	33	23	25%	5	**$100,000**

Calls and clients are rounded down. New fees use a $20,000 average tax plan, the conservative end of a $15,000–$55,000 range.

© 2026 Nexli Automation

NEW FEES EACH MONTH

Even the conservative pace brings in 4× the monthly investment.

NEW TAX PLANNING FEES EACH MONTH, ONCE ADS REACH FULL PACE

THE SETUP FEE

Once ads reach full pace, one month of new fees at the conservative pace covers the $32,000 setup ($40,000).

Conservative	**Within the first month**
Moderate	**About two weeks**
Best case	**About 10 days**

The break-even slide at the end shows when you get there, ramp-up included.

TAX PLANNING IS THE FRONT DOOR

Planning earns the trust. The back end builds the firm.

A $20,000 tax plan proves your expertise. Once a client trusts you, bundle in the work they already pay someone for: bookkeeping and payroll. For a business doing $1M or more, that's about $24,000 a year, recurring, for each client who takes it. Expect about half to.

YEAR-ONE VALUE OF ONE MONTH'S NEW CLIENTS, AT FULL PACE

WHO DOES WHAT

We build and run the machine. You run the calls.

NEXLI BUILDS AND RUNS

- Website and funnel
- The qualifier that screens out bad fits
- Client portal and AI automations
- Ads, creative testing and scaling

YOU RUN

- Every sales call on your calendar
- Selling the tax plan
- Upselling bookkeeping, payroll and compliance
- Delivering the work

The sales process is the one part we don't run. How well you sell tax planning and upsell the back end decides where you land in these scenarios.

WHEN TO EXPECT RESULTS

What the first 90 days really look like.

Days 1–21

Build

NEXLI

Website, funnel and qualifier, client portal, AI automations and ads. The full build takes 21 days at most.

Day 21

Ads go live

NEXLI

We test ad creative for the first 7 to 14 days. New ad accounts take the longest to find their footing, so it won't be perfect yet.

By day 30

First bookings

YOU

Your first couple of calls land on your calendar, and you run them.

Days 30–90

Ramp up

NEXLI + YOU

We put the budget behind the winning ads and bookings get steadier. You sign your first tax planning clients.

Day 90+

Full pace

NEXLI + YOU

Results start to compound. You upsell bookkeeping, payroll and compliance, and we amplify ad spend.

By month 4

In the green

Paying month to month, you've earned back everything you put in, setup included: month 4 at the conservative pace, month 3 at the best-case pace.

WHY WE BUILD THE SYSTEMS FIRST

Meta ads are cold traffic. Cold traffic exposes your systems, who you're targeting and whether people are the right fit. That's why we build the systems and the qualifier before a single ad runs.

© 2026 Nexli Automation

WHAT YOU INVEST

Pay annually and keep about $18,000 more.

MONTH TO MONTH	
Due at signing	**$32,000 setup**
Billed monthly	**Ads + service, from about day 21**
Ads	**$5,000 a month**
Nexli service	**$4,997 a month**
Year one total	**$151,964**
Less cash up front	

PAID ANNUALLY	
Due at signing	**$74,000 setup + annual plan**
Billed monthly	**Ads only, from about day 21**
Ads	**$5,000 a month**
Nexli service	**In the annual plan ($3,500 a month)**
Year one total	**$134,000**
Keep $17,964 more in year one	

Nothing monthly is billed until your build is done and ads launch, about day 21. On the annual plan, your ads are the only monthly bill. Paying annually puts $42,000 more in at signing, so you break even in the same month or one month later. From month 9 on you're ahead, and by month 12 you've kept about $18,000 more.

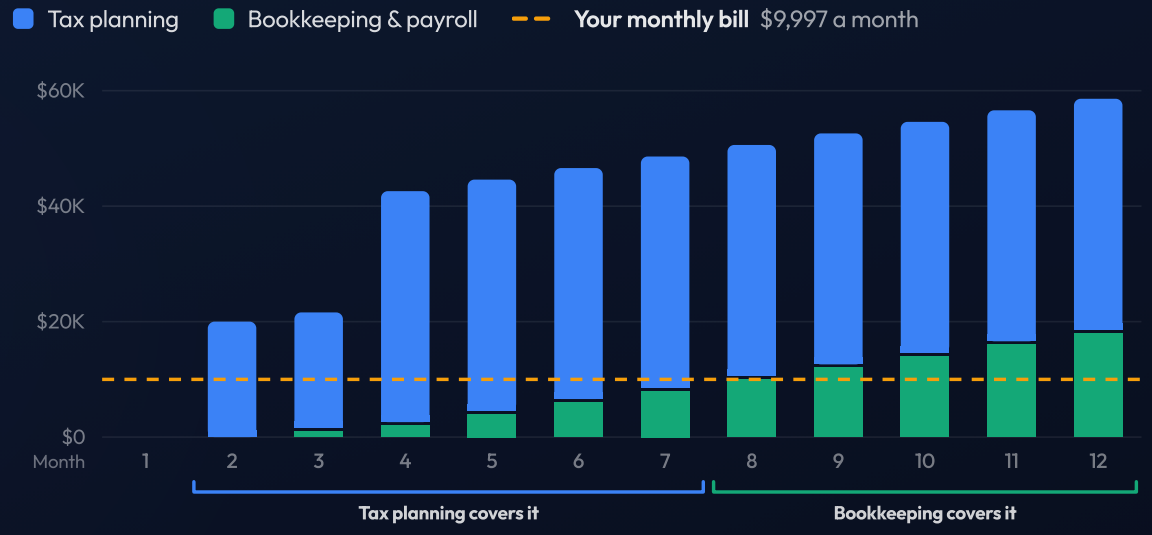

© 2026 Nexli Automation

THE FULL PICTURE

Your new bookkeeping and payroll clients cover our monthly fee for you.

Tax planning pays for it first. Bookkeeping and payroll build up month by month until, by month 8, they cover the whole bill on their own: our fee and your ads, $9,997 a month. After that, every tax plan is the bonus.

WHAT COMES IN EACH MONTH, CONSERVATIVE PACE

TAX PLANNING BECOMES THE CHERRY ON TOP

1. **First, tax planning pays for it.**
   From month 2, your new plans bring in $20,000 a month, then $40,000, against a $9,997 bill.

2. **By month 8, bookkeeping and payroll cover it alone.**
   $10,000 a month, and still growing: $18,000 a month by month 12.

3. **From then on, every tax plan is the bonus.**
   Paid up front, on top of a bill that's already covered, and it keeps compounding.

© 2026 Nexli Automation

AFTER 12 MONTHS

Going into year two, you're about $392,000 a year in the green.

Tax planning clients renew every year, and bookkeeping and payroll keep paying every month. Even if only 80% stay, this is the recurring revenue you start year two with, before you sign anyone new.

YOUR RECURRING BOOK AFTER 12 MONTHS, CONSERVATIVE PACE, 80% STAYING

Tax planning renewals 16 of 20 clients × $20,000	**$320,000**
Bookkeeping and payroll 8 of 10 clients × $24,000 a year	**$192,000**
Recurring revenue a year	**$512,000**
The system for a year $9,997 a month × 12, ads and our fee	**−$119,964**

IN THE GREEN **$392,036** a year

IN THE GREEN GOING INTO YEAR TWO

Conservative	**about $392,000** a year
Moderate	**about $648,000** a year
Best case	**about $1,160,000** a year

WHY IT'S STILL CONSERVATIVE

80% is the low end of the 78%–85% full-service firms average. Top firms keep 93%–96%.

Only your year-one clients. Everyone you sign in year two is on top.

Tax plans at $20,000, the low end of $15,000–$55,000, and compliance work isn't counted.

WHEN YOU BREAK EVEN

Conservative pace: in the green by month 4.

WHERE YOU STAND AT THE CONSERVATIVE PACE, BUNDLE INCLUDED, AFTER EVERYTHING PAID TO NEXLI

BY SCENARIO

Conservative — 20 clients by month 12

MONTH TO MONTH	PAID ANNUALLY
In the green month 4	**In the green month 5**
about $339,000 by month 12	about $357,000 by month 12

Moderate — 30 clients by month 12

MONTH TO MONTH	PAID ANNUALLY
In the green month 4	**In the green month 4**
about $585,000 by month 12	about $602,000 by month 12

Best case — 50 clients by month 12

MONTH TO MONTH	PAID ANNUALLY
In the green month 3	**In the green month 3**
about $1,076,000 by month 12	about $1,094,000 by month 12

How this is figured

Every number counts the bundle: the tax plan when a client signs, plus $2,000 a month in bookkeeping and payroll from the next month for half your planning clients. Compliance work isn't counted. No new clients in month 1, half your pace in months 2 and 3, full pace from month 4. Month to month: $32,000 at signing, then $9,997 a month from launch (about day 21). Paid annually: $74,000 at signing ($32,000 setup plus $42,000 for the annual plan), then $5,000 a month in ads from launch. Net is after everything paid to Nexli, before your cost of doing the work.
